

Opportunity

Global opportunities exist for a limited number of dynamic companies wishing to increase their product lines.

Tissue Culture Biologicals is looking for established distributors to expand in the US as well as Europe and the Far East.

We have the manufacturing relationships and capability to supply the ever increasing biotechnology industry while offering over **30 years experience** in serum processing and handling.

Made in the USA still stands for something special at **Tissue Culture Biologicals**. The words Made in the United States and Manufactured in the USA are rarely seen these days. While we can offer material from other sources, if the market dictates, most of our products are collected and processed in California.

While the US market seems to be over saturated with serum brokers, we offer a legitimate relationship as an experienced United States manufacturer.
